Parent/Student Panel Night

Wednesday, March 20th is the Parent/Student panel about Supporting your Middle Schooler at Tyee and Beyond. There is a change of location, this event will be hosted in the Library and not the commons. We look forward to our Tyee community attending.

Tyee PTSA is hosting this parent/student panel to hear from past Tyee students and Parents of High Schoolers on How to Best Support your Child in Middle School - Supporting healthy perspectives. This will be an interactive Q and A format, topics will range from first hand experience of finding balance physically, emotionally, academically for your child to how to learn from mistakes as students mature through their middle school years. We acknowledge that high school registration is also taking place, and we will have parents with high schoolers that would be happy to share their perspectives on transition to high school.

The panel serves as a parent education opportunity through first hand experiences. We recognize that our students are going through tremendous change in middle school and as this happens, how can we as parents be the best support to help them grow, learn from mistakes, and take on a positive perspective with managing all aspects of their development. Any questions that you would like the panel to address on the 20th, feel free to email them before the 19th to parentpanel@tyepts.org.
