

Buzz Bowl

Makes learning Fun!

Learning Math and Science can be Fun too!

Join us @ Highland Middle School

February 4, 2023 ~ 8:30am — 2:30pm

My name is [Kosha Upadhyay](#). I'm an accomplished [international award-winning](#) student. I created **Buzz Bowl**, a buzzer game to make Math and Science learning fun for **5th-8th graders**. My previous events were a [huge success](#). See what the [students from my past Buzz Bowl events have to say](#) about their experience.

Buzz Bowl events are always [packed](#) because we make it **much easier** for kids who are **beginning to learn science** and **very challenging** for **Advanced players** and **Science Bowl Whizzes**. We offer reading material guidance and play all difficulty levels separately to provide an exclusive and level appropriate experience.

Buzz Bowl is for everyone because it uses middle school level study material. Kids just need to pick a subject, study the recommended material, come have fun and possibly win awards! We always try to give **more awards** than our last event.

For new parents: [Buzz Bowl](#) is a buzzer game of multiple-choice and short answer questions. Teams challenge each other to buzz faster and answer the questions. Whether your kid is a beginner, intermediate or a whiz, it offers fun and challenge to everyone! For additional questions email us at science4community@gmail.com

To register your team, go to <https://goo.gl/WqSJML>

We always get oversubscribed. So hurry, the seats are limited !!!

Your participation will help [Bellevue Schools Foundation](#) to fund more programs which matter to you!

Note: The final game schedule and other details will be sent to confirmed participants only.
